Receive multiple types of inbound orders	<ul style="list-style-type: none"> • Supports receipt of purchase orders, customer returns and transfers
Receive with multiple operators	<ul style="list-style-type: none"> • Ability to have multiple receivers operating simultaneously on the same orders
Lot control and expiration date	<ul style="list-style-type: none"> • Ability to ensure that lot numbers and/or expiration dates are captured during receiving
Receipt of multiple units of measure	<ul style="list-style-type: none"> • Supports multiple barcodes and packaging levels for flexible receiving and warehouse operations
Licence plate receipts	<ul style="list-style-type: none"> • Pre-printed license plates can be placed on pallets, totes or other loading devices for inventory tracking purposes
Directed putaway	<ul style="list-style-type: none"> • Support for RF system-directed putaway based on system or user-defined zones and storage locations
Real time transactions	<ul style="list-style-type: none"> • Confirmed and validated transactions are posted in real time to the business enterprise server
Multiple inbound methodologies	<ul style="list-style-type: none"> • Standard receive and putaway • Direct mode receive to stock
Cross docking	<ul style="list-style-type: none"> • Supports optimistic cross docking; eliminating put-away, replenishment and picking of back orders

Outbound Logistics

Feature	Benefit
Order consolidation	• Ability to consolidate multiple orders for picking
Zone operations	• Supports system or user-defined zones for efficient picking
RF system-directed picking	• Pick and packing productivity and accuracy are optimized using real time RF terminals.
Multiple units of measure	• Supports picking by more than one unit of measure such as each, master pack, carton, pallet etc.
Wave picking	• Ability to release orders in waves based on user defined methods
Cluster picking	• Ability to pick, sort and confirm multiple orders in a single pick path
Shipment Validation	• Indago™ validates and confirms that all items on order are processed before releasing
LPN picking	• Use of internal licence plates enable users to pick into containers based on ship to information. LPN is then used at the packing and consolidation areas
Unlimited pick locations	• Items can be assigned to more than one pick location

Inventory

Feature	Benefit
Multiple stocking locations and types	• Indago™ allows for various stocking locations and types for better inventory management
Multiple levels of inventory	• Indago™ supports multiple levels of packaging such as each, master pack, case, carton, pallet etc.
Cycle counting	• Ability to manage cycle counting with mobile RF terminals
Demand cycle counting	• Allows a user to demand a cycle count by product or location, on the fly
Inventory transfers	• Ability to manage movement of inventory internally from stocking locations
RF inventory inquiries	• One of Indago's many mobile utilities enables users to perform on-demand inventory inquiries
