## Your Efficient Business Solution

# Indago™ WMS

In today's competitive market, it is critical that you are able to increase efficiency and give your business a competitive advantage. JMO can help you overcome this challenge with our innovative Warehouse Management Solution, Indago.

Indago WMS is a client and mobile-based Warehouse Management System designed to integrate easily with your company's existing information system. Indago is built using leading edge .NET and SQL Server technology, providing mid-market companies with a rich and flexible solution.

Indago provides your company with the ability to keep tight controls over its ever-moving inventory. Knowing where your inventory is each and every moment is crucial to expediting orders and workflow. The Indago server, at the core of the System, is capable of handling large volumes of information. It is also scalable to any organization's size and requirements.

Indago is designed to improve material flow and throughput. It is engineered and developed to help you control costs, increase inventory accuracy, and track all inventory movements. The powerful mobile applications empower your work force with real time radio frequency terminals, which not only increase productivity but also eliminate error.

### Why Distributors Should Consider Indago WMS

#### Increased Inventory Control

Indago effectively and accurately tracks inventory within the fulfillment center.

#### Increased Customer Satisfaction

Indago increases your order packing and shipping accuracy, improving order fulfillment.

#### Reduced Operating Costs

Indago WMS provides an efficient flow of goods through the fulfillment center, reducing handling costs and minimizing travel.

The demands on warehouse management are becoming more and more complex. Costs need to be minimized, while improving customer service and operations.

Whether you operate a distribution center, storage facility, or manufacturing plant, you can use Indago WMS to efficiently manage and operate the warehouse.

Using Indago, you will decrease inventory, improve order fulfillment, reduce order cycle time, eliminate charge backs and exceed your customers' expectations. Indago helps you achieve flawless execution of your warehouse operations.

**Track every unit down to the lowest level of detail.**

**Cycle counting operations.**

**Eliminate that dreaded annual physical and keep your business up and running.**

### Inbound Logistics

Indago WMS supports receipt of purchase orders, transfers and returns in two routing methodologies:

- Standard (receive with directed put away)
- Direct (receive to stock)

#### Functions

- Receipt of inventory
- Barcode printing
- Opportunistic cross docking
- Directed put away
- Notification of orders pending for products
- One-step put away to bin receiving
- Cross reference to multiple parts numbers
- Multiple users can operate simultaneously
- Random or directed put away
- Discrepancy reports

### Inventory Management

Indago WMS provides advanced lot and serial tracking control for inventory. Also, cycle and physical inventory counting capabilities enable extended inventory management controls.

#### Functions

- Advanced locator system
- Lot and serial tracking
- FIFO stock rotation
- Inventory tracking throughout warehouse
- Stock adjustments
- Multiple bin locations

### Outbound Logistics

Indago WMS automates warehouse picking tasks and consolidates packing tasks in a variety of methodologies.

#### Functions

- Standard picking (pick and stage for packing)
- Direct picking (pick to container)
- Task assignment to pickers
- Container packing
- Zone managed picking
- Integrated multi-container shipping
- Packing slips and container labels on demand
- Tracking of vital shipping information

### Value Added Services

Indago WMS is equipped with advanced barcode printing capabilities and on-demand labels available from both mobile and terminal interfaces.

#### Functions

- Advanced label print engine
- Flexible label designer (optional)
- On-demand label printing
- Web reports

## Facts at a Glance
