

JMO Systems is a full service integrator of enterprise-wide, enterprise-ready solutions. By means of our extensive range of services, which include: consulting; database design; system architecture; project management; and systems integration; as well as off the shelf products, JMO is able to assess, architect and execute client-appropriate solutions.

#### database services

Speed, accuracy and accessibility are key requirements of database systems. JMO enables users to access their data and helps them transform this data into information. Whether involving multivalued or relational environments, JMO specializes in closing the gap between technology and information systems. Our areas of expertise include:

- Microsoft SQL Server
- Oracle
- Informix
- MySQL
- Others

#### mobile and auto ID

Applying Mobile Technology to Your Enterprise:

- Sales Force Automation
- Manufacturing Line
- Statistical Quality Control
- Distribution Center

Specialized Applications:

- Field Service
- Health Care
- Transportation
- Hospitality

#### professional services

#### strategic alliances

JMO is partnered with Symbol Technologies, Microsoft Great Plains, Cisco, Cognos, IBM and Wavelink as a solution provider and reseller of tools necessary to the provision of personalized services.

#### company ownership

JMO is a privately held C corporation owned in majority by its founder and President, John Oliveira. As part owner, Vice President Mark Fronczak has been with JMO for over eight years. Together, John and Mark have focused on business development, innovation and customer service—resulting in JMO’s lasting success.

#### management structure

The JMO team includes fifteen employees working under a president and a vice president. Our main managerial divisions are sales, service and administration. The expert service team at JMO deals with customer service, technical support, user training, database management and software development.
